01.09.2023 - PRESENT

KSTU named after I. Razzakov

- Information security of automated systems

01.07.2022 - 31.03.2023

Peaksoft House

- HTML, CSS, JavaScript and React

ABOUT ME

I'm a Frontend developer with a passion for JavaScript, TypeScript, Next.js and React. With over a year of professional experience, I have specialised in building responsive and reusable UI components. My approach to development is based on the principles of Agile philosophy, I apply Scrum methodology, complementing it with Agile principles to organise a more predictable development process. In addition to technical skills, I also have an aptitude for teaching and mentoring. During this time, I have mentored more than 50 students. My passion for quality work and helping others succeed makes me a valuable team member.

WORK EXPERIENCE

Peaksoft House   01.04.2023 - PRESENT
Frontend mentor

- Teaching students at all levels of proficiency in HTML, CSS, JavaScript, and React from beginners to experienced is my responsibility.
- Developing students' programming skills through personalized feedback and support.
- Creating a positive and inclusive learning environment that fosters collaboration and creativity is a key aspect of my job.
- Collaborating with colleagues to develop and improve instructional materials is also part of my remit.

Peaksoft House   01.01.2023 - 31.03.2023
Frontend developer intern

- Participated in the "Gadgetarium" project, collaborating with backend specialists, a designer, and a project manager.
- Conducted tri-weekly meetings to distribute tasks and address emerging issues for "Gadgetarium".
- Led the frontend team as needed, ensuring tasks were completed efficiently and effectively.
- Invested significant time and effort into "Gadgetarium", enjoying the work and contributing to its success.
- Recognized for my performance with an additional role in the "MedCheck" project by the project manager.
- Managed responsibilities across both "Gadgetarium" and "MedCheck" projects concurrently.
- Built strong, collaborative relationships with all team members, including the backend team.

CERTIFICATES

1. Graduate of the programming course Peaksoft House.
2. Participation in hackathon "Let'sGoDigital 2.0".
3. Participation in hackathon "Let'sGoDigital 3.0".
4. JavaScript HackerRank
5. Print Speed Ratatype

PROJECTS

Peaksoft House   01.05.2023 - PRESENT

This is a website where you can find information about the company, its mission, and values. Additionally, you can register for courses offered by the company.

Tool : Next   Deploy

Gadgetarium   01.03.2023 - 31.03.2023

This is online store where users can buy gadgets.

Tool : React   Figma

MedCheck   01.03.2023 - 31.03.2023

This is a website to provide information on the clinic's medical services and to facilitate the process of recording patients.

Tool : React   Figma

We applied the Agile philosophy in our projects, including conducting Stand-up meetings, managing tasks through the ClickUp website, and collaborating with Java developers , PM and designers.

And many other projects you can see in **GitHub**
